medstar COMPACT

Designed with the small to medium sized clinic in mind, this low cost device is designed for cleaning smaller batches of surgical equipment and rigid endoscopes. The Compact has the same advanced cleaning capabilities as the rest of the Medstar range.

Designed to accept 2 x half DIN trays or 1 x full DIN tray, Medstar Compact will deliver instruments to under 1µg of protein per side and reduce bacteria to >log5 reduction* - all without heat.

Medstar Compact will also accept rigid endoscopes at up to 500mm total length.

For ongoing validation our CVD is offered as an option. This device will assist the user in measuring and maintaining the system at it's optimum in terms of ultrasonic performance. Just another way that Alphasonics can assure piece of mind, regardless of what or even how much you're cleaning.

*As confirmed by independent laboratory testing.

FEATURES

- Automatic cycle.
- Easy to use.
- LCD display.
- Automatic chemical dosing.
- Free-standing model.
- Can accept half DIN and full DIN trays
- Compliant in part with HTM 01-01 2016.
- Validation optional.

BENEFITS

- Lower cost device.
- Can clean both instruments and rigid endoscopes.
- Protein removal to under 1µg.
- >log5 bacteria removal.
