

TECHNICAL DATA SHEET

ALPHASONICS
ADVANCED ULTRASONIC CLEANING SYSTEMS

PRODUCT INFO

PRODUCT NAME

PRC 150

ELECTRICAL SUPPLY

240/1/50 or 110/1/60

TANK CONSTRUCTION

2mm 316L Stainless Steel

OUTER CASING

3D Printed PET-G

SUB DRIVE BAR LENGTH

220mm

HEATER

200W

ULTRASONICS

200W

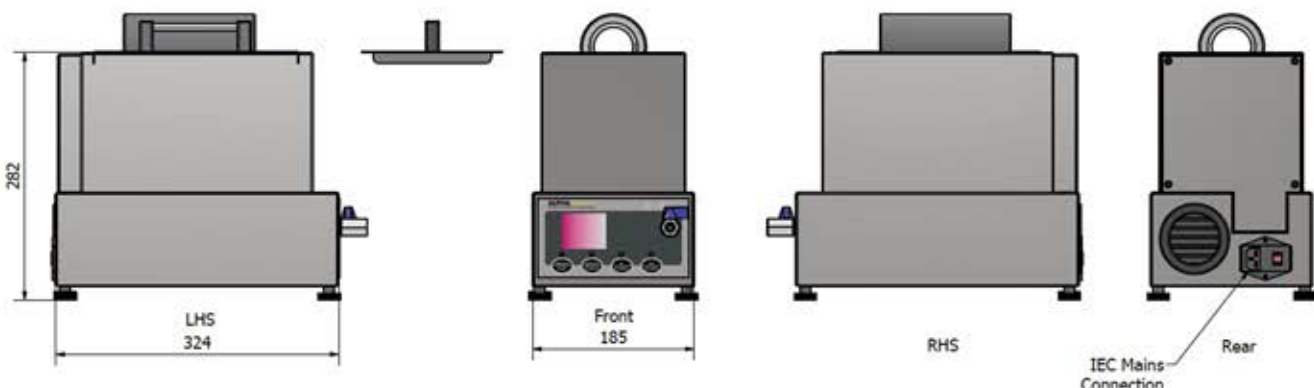

The Alphasonics PRC150 Proofing Roll Cleaning System is a compact, purpose-built ultrasonic cleaning solution designed specifically for anilox proofing rolls.

Combining advanced Alphasound ultrasonic technology with controlled roll rotation, it effectively removes ink and coating residues from roll cells and surfaces, helping maintain consistent proofing performance. Two sets of driven, plastic-coated shafts securely support and rotate rolls of different lengths and diameters, ensuring even exposure to the ultrasonic cleaning action while reducing reliance on manual cleaning.

Its compact bench-top design provides a controlled and repeatable cleaning process, while the modern 3D-printed enclosure creates a clean, purpose-designed finish. The PRC150 brings Alphasonics' proven ultrasonic technology and print industry expertise together in a specialist solution designed to make proofing roll cleaning simpler, more consistent and more effective.
